
What about other hybrids?

Posted by DianaR - 2008/07/15 06:53

I was watching The Today Show and they featured electric scooters and power assisted bicycles. They also showed a hybrid motorcycle that can go 90 MPH.

These vehicles can be plugged in at home to charge over night and are much cheaper than hybrid cars.

I bet they catch on first, because of price, and will force down the prices on hybrid cars, which are simply ridiculous right now.
