
Photovoltaic panels

Posted by Rohitpatel - 2007/07/18 18:10

Does anyone know what are the most effective and popular Photovoltaic panels used for residential buildings? Any latest technology for solar photovoltaics system? For instance, able to connect wirelessly?

=====

The problem with wireless energy is that it's incredibly dangerous - it's a high powered electric current going through the air.

This guy seems to be a ig fan of wireless energy:
